# Umbo Light

Overview

A neural network based artificial super intelligence that sees the world as we do. Light can recognize critical security events more accurately than traditional video analytics. It is built to work in any scenario - indoors, outdoors, or any weather conditions.

Winner: Security Industry Association NPS award, Best in Video Analytics at ISC West 2017

Winner: Nvidia Deep Learning Conference ECS 2016 Best of Show

Key Features

- Intelligent Computer Vision that sees people and their behaviors, rather than just tracking motion
- The industry's most accurate intrusion detection
- Real-time, qualified alerts
- Integrates natively with Umbo Learning Cameras
- Easy to use
