

# SUSTAINABLE *Beautiful World*

## EF WOOD

SUSTAINABLE, ENVIRONMENTALLY FRIENDLY, AND DURABLE GREEN MATERIALS

### Robust, weather-resistant, and ultra-long lifespan

Immersion in water at 60°C for over a year without cracking or deformation. Boiling in 100°C water for 3 days and 3 nights without cracking or deformation. Resistant to repeated freezing and thawing without cracking or deformation. Capable of bearing loads of over 700 kilograms (solid) or 460 kilograms (hollow) across a span of 35 centimeters.

### Multiple colors, patterns, and specifications

Solid and hollow designs each offer unique advantages for various environments. Utilizes natural pigments for a diverse range of color options and customizable combinations. Outstanding wood-grain embossing for a superior tactile experience, warm and comfortable to the touch. Can be manufactured in various thicknesses, lengths, and widths according to specific needs. Showcases recycled textile fibers to demonstrate environmental value.

### The favorite of high-end customers

Popular in export markets such as Japan and Europe and America. Widely used in public construction and sports venues across multiple countries. Helps create a sustainable environmental value for brand image. Easy to construct, durable, weather-resistant, and suitable for long-term use.
