

Developing Program

Beyond 5G (B5G)

An Experimental Project of LEO Communication
Satellite Constellation

Mission Orbit: Altitude 600km, inclination 29°-53° (TBD)

- Improving Communication Quality in Remote Areas of Taiwan.
- Providing industry technology verification and market expanding opportunities.
- Applications: Broadband Network Services, Video Conferencing, Internet of Things.
- Coverage: 1500 x 1500 km.
- Data Transfer Rate: 800Mbps.
