● Search results

Making use of the fault-tolerant query for homophone/ similar syllable can get anticipating search results as well, even if the search content is not exactly the same. The search engine differs from others in the industry. Keywords are distributed to different attachment files. If all the keywords belong to the same file, the search engine will show only one entry on the screen. For other search engines, search results are dispersed into several entries.

● The keywords in the attachment files are marked with colors and the context is presented.

Summary

English version of the company briefing,the summary is as follows:
GSS is a software development company primarily engaged in software talent training and the software technology development business.
At GSS, we believe our caring attitude, professional methodologies, and talented software application developers are the fundamental basis for providing good quality software services and establishing a long-term relationship with our customers. We can proudly say, "In today's era of ever-changing information technology, we are able to grasp the trends in software development quickly yet accurately and introduce the new knowledge to our customers. When planning special projects at GSS, we always apply the principle of "creating value for the customer" as our primary objective."
At GSS, we have grown healthily and strongly with our customers over the years. Our excellent track record in providing quality software development projects is the best proof of that.
Since our establishment in 1987, we have accumulated a variety of business application experiences, and more importantly, we have realized the ultimate goal at GSS to transform software products and services into "visible values", that is, to continuously help our customers increase their competitiveness and create more value for them.
In the coming future, we will continue to engage in research and development to create better value. Also, through the ISO 9001 Quality Certification mechanism which can be passed on to others.

Discussions

English version of the company can be made into a video file upload to Youtube?

Tracy Chiang [2017/06/29 14:48:50]

Hi Chuck Kuo

Will you be able to help the English company profile dubbing, so that more foreign customers can quickly understand the GSS?

Galaxy Software Services Corporation

An Introduction

It is allowed to download by page to reduce the bandwidth demands. The file formats which support online reviews include: Office (doc, ppt, xls, docx, pptx, xlsx), OpenOffice, pdf, gif, jpg, png, tif.

Support online review of the thumbnail preview of attachment files.

Design your own knowledge type (form) fields. Never miss any essential information!

Tag cloud.

Save the history records of every version and automatically compare the differences.

Call your partners with @. The one who is called will receive a notification letter to accelerate message transfer.

Meet the privileged access control for companies

The user can make a choice according to actual demands.The privileges of folders (read, add, revise, delete, view attachments, download attachments, etc.) can be set with single/ multiple items according to roles, organizations, groups or persons.
