PlastiCircular® RECYCLED POTTED PLANTS

Black Thumb No More :
Most convenient gardening with
the design of replenishing water!

100% Commitment to Recycling

A great number of over 50% of the gift vouchers are offered after recycling to support circular products!

- The products are made of recycled plastic materials and rice farming waste (from Nantou in Taiwan).
- Proving that lowering the missions of Carbon Footprints could help with the reduction of plastic usage.
- The technologically absorbent sponge can effectively and automatically replenish water for 1-2 weeks
- We can use the original rotating water tray to eliminate mosquitoes and, as a soap case after planting.
- The greatest thing is that you no longer have to worry about plants withering during Long-term traveling.
