

tsti AIoT Smart Toilet Solution

Thoughtfulness and safety brought by technology

Smart toilets are closely related to people's lives, and it is one of the projects in smart city projects to introduce and make people feel the most.

ESG is a topic that enterprises and public departments have paid attention to in recent years, and smart toilets can provide benefits in all aspects of ESG. It can be said that enterprises and public departments can obtain the most suitable project for ESG projects at the lowest cost.

Smart toilets help managers use data for **maintenance and management**, accurately grasp the **supply of consumables**, and provide the best **protection for toilet safety**.

Features

Security - It provides uninterrupted security protection without a camera, even in remote areas or in the midnight, you can still get the warning in real-time.

Cut Cost - With the aid of technology, it is possible to optimize the arrangement of manpower, improve the efficiency of manpower use, and reduce costs.

Flexibility - It is suitable for pre-installation and aftermarket installation, and can also provide modular functions and installations according to requirements.

Comfortable - Smart environmental monitoring, when exceeding the standard, immediately dispatch staff to clean and replenish consumables to maintain comfort.

Data Management - Provide consumable usage and environmental data analysis, which can help managers conduct accurate analysis and future decision-making basis.

Cases

The solution is expected to be introduced into Taipei Longshan Temple Underground Shopping Mall, Taoyuan Hutoushan Environmental Park, Chiayi City Mortuary Services Office, Kaohsiung Love River, Hualien Hakka Culture Hall, Taitung Tiehua Music Village, Jihben National Forest Recreation Area, etc.
