我們秉持「以人為本」的初心，深耕停車場域規劃與智慧應用已逾20年。

透過大數據整合、AI設備整合應用與軟體研發，打造易於操作的人性化停車管理系統。

With a people-centered approach, Taiwan International has been dedicated to parking infrastructure and smart solutions for over 20 years.

Through big data integration, AI technology, and software development, we deliver intuitive and user-friendly parking management systems.

## 從偵測到決策 | 打造會說話的停車城市

### From Sensing to Decision-Making | Building a City Where Parking Talks

### 車況智慧設備偵測 | 前端資料收容

Vehicle Status Sensing Devices | Front-End Data Collection

車流在哪？設備知道  
智慧停車從基礎建設開始，串聯每一個節點，  
才能進入真正的城市治理

Where's the traffic? The devices know. Smart parking begins with infrastructure—connecting every node is the path to true urban governance.

- 路外停車場智慧設備設計規劃
- 路邊停車格智慧設備導入顧問
- 停車產業深度經驗知識與建議

- Off-Street IoT Integration
- On-Street Sensor Deployment
- Parking Systems Expertise

### 路側 IOT 串聯 | 建構資料網絡

Roadside IoT Integration | Building a Connected Data Network

每個設備都是一個節點，連成城市交通的神經網  
我們善於串接多元設備，建立互通資料標準

Every device is a node—together they form the neural network of urban mobility. We specialize in integrating diverse hardware and establishing unified data standards.

- 整合多元設備資料
- 提供統一 API 管理架構
- 實現跨廠牌、跨區域的資料共通性

- Integrating data from various devices
- Providing a unified API management framework
- Enabling interoperability across brands and regions

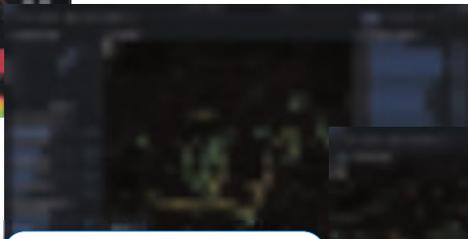

設備即時監控  
Real-Time Equipment Monitoring

### 雲端治理平台 | 從資料到決策

Cloud Governance Platform | From Data to Decision

雲端治理平台匯聚四大核心功能，打造數據收集至決策制定的完整管理循環：

The cloud-based management platform integrates four core functional modules to establish a complete operational cycle—from data collection to policy decision-making:

停車週轉率分析  
Parking Turnover Analysis

四大功能無縫串聯，形成從數據擷取、行為洞察、導引優化到政策決策的一站式智慧治理閉環。

These four modules are seamlessly interconnected, creating a closed-loop system that enables one-stop smart governance—from data capture and behavioral analysis to operational optimization and policy-making.
