

Highest Quality
UVC Tube
MADE IN JAPAN

UV Guardian

SMART UVC DISINFECTION SYSTEM

Equipped with motion sensor, no manual switch is required; UV Guardian Ultraviolet Disinfection System is conducted **fully automatically** after each person enters and exits rooms to prevent cross-infection.

Less Time, Less Labor, continuing protection during the pandemic

The traditional disinfection method is more labor-intensive and less productive. Our smart system is conducted automatically after each person enters and exits the space, no manual switch required.

Automatically turn off when people approaching

The Smart UVC System utilizes motion sensors to provide extra protection to avoid people exposed to the dangerous UVC emission. Preventing possible damage and much safer compared to the manual UVC light.

Automated Technology significantly extends the lifespan of the UVC tube

The system will be automatically turned off and enter the standby mode after the sterilization process, which can significantly extend the lifespan of the precious tube.

System designed and made in Taiwan plus highest quality UVC tube from Japan

System designed and manufactured in Taiwan. Ballast designed with a warm start function to prevent the blackening of the UV tube. Come together with the highest quality UVC tube at 253.7nm from Japan.

SMART Features :

- Sensor triggers and immediately shuts off ALL sterilization lamps wirelessly.
- Sensing nobody in 3 minutes, starting sterilization for 30 minutes.
- People enter during the sterilization process, immediately shut down.
- After the sterilization process is completed, enter the standby mode.
- After personnel enter and leave again, immediately carry out sterilization.

Electrical Specifications :

- Operating Voltage : AC 95 ~ 265V 50/60Hz
- Rated Power : 22W
- UVC Power : 7.5W
- Wave Length : UVC 253.7nm
- Applying Space : 10~15 M²

Dimensions :

- Tube Diameter : Ø 32.5mm
- Lampholder Length : 610mm
- Weight Including Tube : ≈ 260g

May cause harm to people, animals and plants. Do not irradiate directly

Designed and made in Taiwan. Patented product. ALL RIGHTS RESERVED.
