ABOUT US

Panosensing was founded in 2016, with the aim to provide various VR/AR applications and solutions with advanced technologies.

With multidiscipline skillsets and infinite creativities, Panosensing is able to provide various services such as VR (Virtual Reality) Guiding Website, 6 Dof VR experiences development, AR (Augmented Reality) development and 3D model scanning.

Panosensing's renowned solution "VR Guiding Website" , with seamless, high resolution panorama photos and user-friendly UI/UX designs, has been selected for various governmental and commercial projects. Including National Museum of History, Christmas Land in New Taipei City, and Lantern Festival in Taipei City.

We are now releasing this rare opportunity to media companies around the globe, having our design team to cooperate with your photographers to build exceptional VR websites.

Exhibition 'Traces of Brush and Ink'

VR GUIDING WEBSITE

Have you ever feel that traditional websites are a bit dull?

Although 6-Degree-of-Freedom (DoF) head-mounted display (HMD) VR looks fascinating, the production costs is very high and there are many limitations in order to access the experience.

VR Guiding Website is the solution to close the gap between traditional websites and 6 DoF HMD VR.

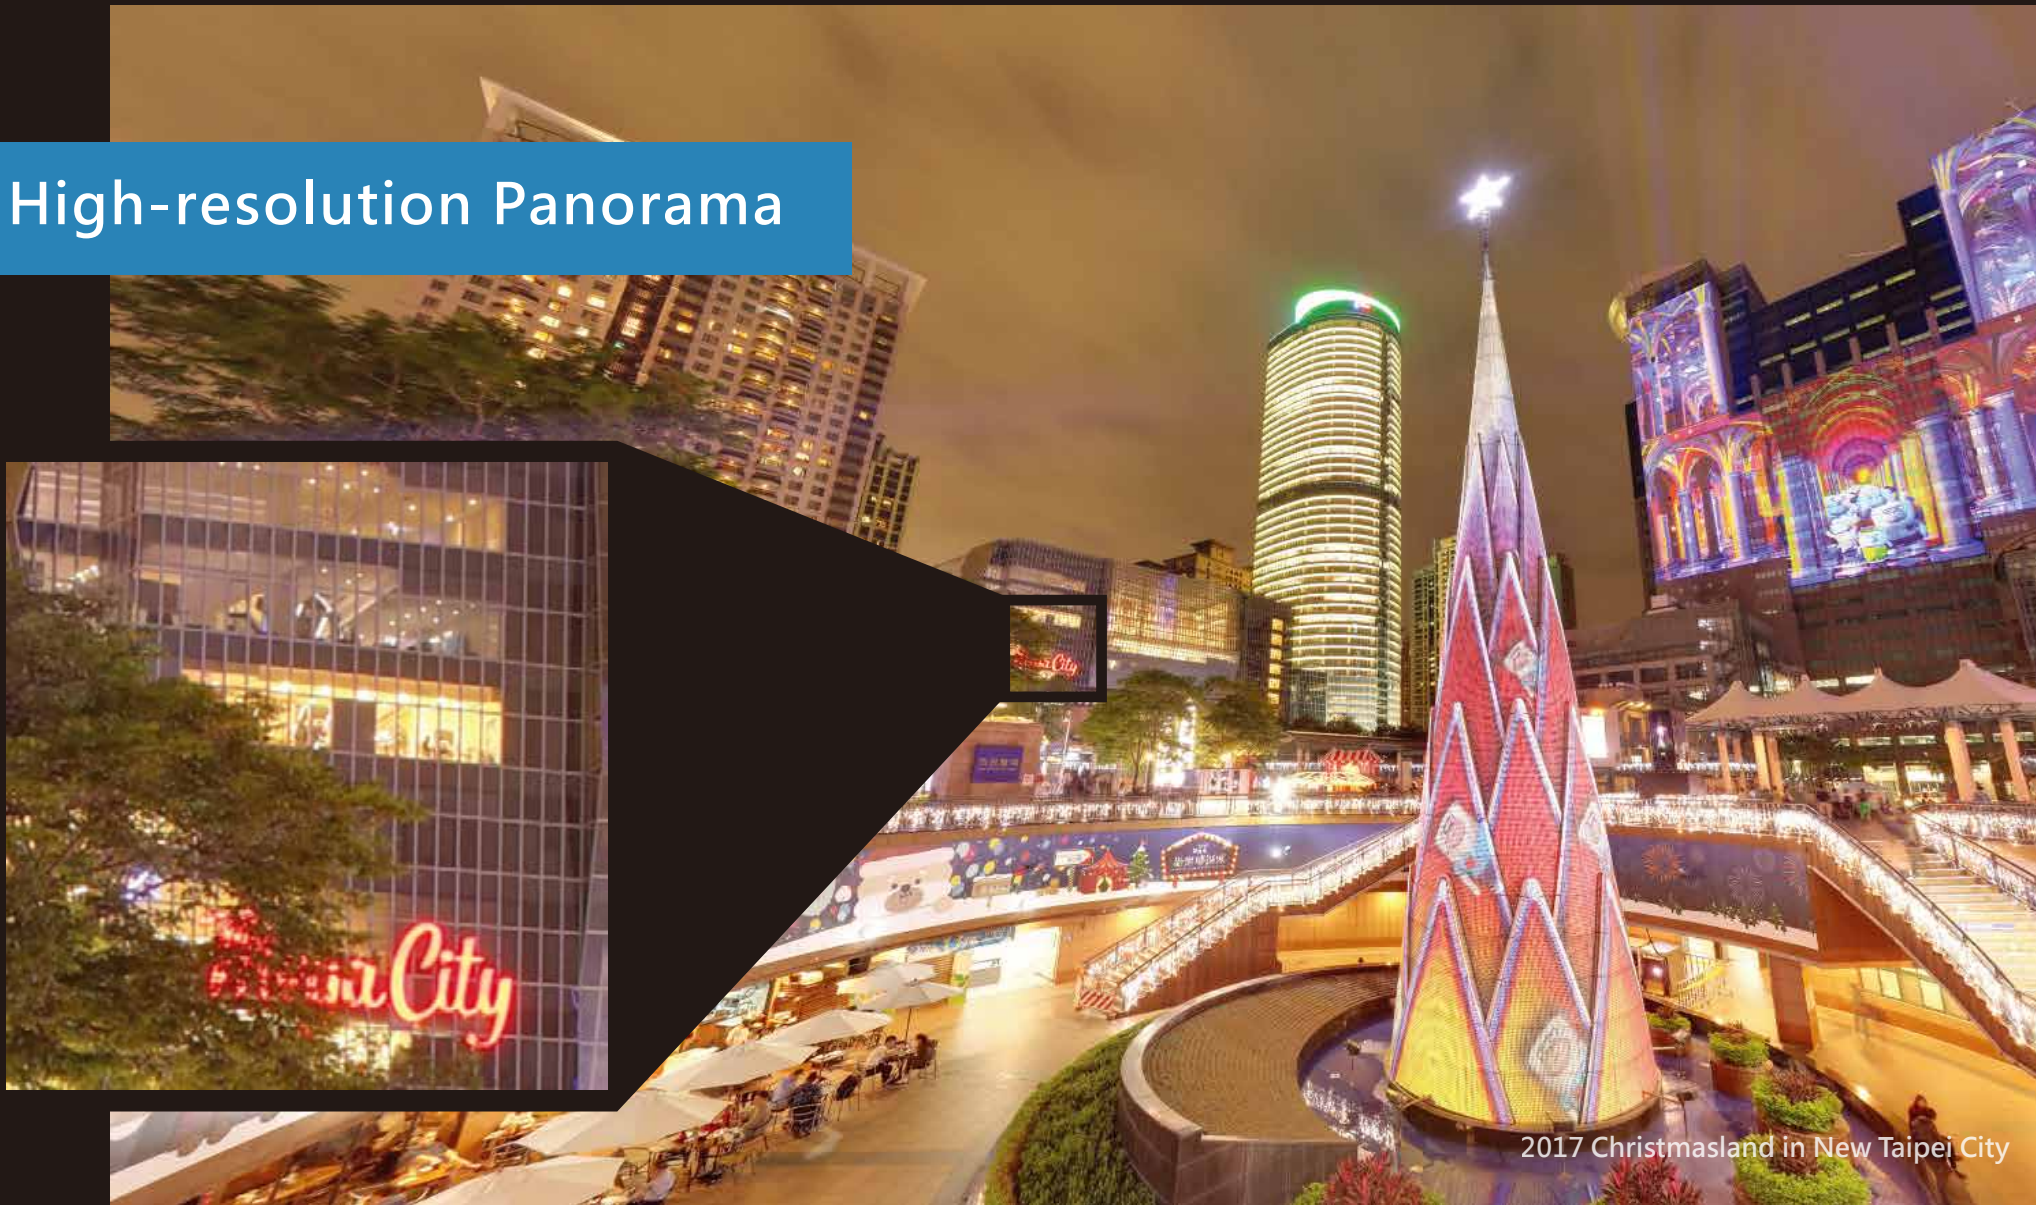

Users can immerse into VR experiments via computer or mobile devices without purchasing expensive devices or downloading apps. With lower production cost, VR Guiding Website is no doubt the champion among VR contents in terms of cost-performance value.

Well experienced in designing UI & UX, Panosensing is able to provide highly customized VR Guiding Website according to customers' needs.
