Taipei Smart Campus 4.0 ~ Little Green e-day

Taipei City is committed to building a smart campus. Beiyi Girls' High School plans a smart campus life based on students' full-time study and life, including providing convenient online payment services for parents on campus, and building a "Smart Health System" where students can go to the health room Online registration and digital records of injury and illness treatment are instant and convenient. In addition, a "Smart Ordering System Electronic Payment" has been built for students to make lunch reservations with the school's hot food department. School-leaving information and online will be established in March next year. Personalized services such as leave, class notices, etc., to establish a complete platform for pro-teacher and student learning integration. These specific measures have turned Beiyinu into a model school for Smart Campus 4.0.

Beiyi Girls' High School has used the campus payment system since the 109 school year and no longer prints the traditional three- and four-part forms on paper. Students' tuition and miscellaneous fees are almost paid online, and cashless payment accounts for 71.3% (including electronic payment 14%, credit card 51.7%, ATM5.6%), compared with the payment situation in the second semester of the 108 academic year (electronic payment 3.6%, credit card 18.7%, ATM5.3%), a substantial increase of nearly 2.6 times, and an increase of nearly 4 times for electronic payment , Which shows that parents can accept smart payment methods.

Secondly, Beiyi Girls' High School took the lead in introducing the most anticipated "Smart Ordering System Electronic Payment" by students. This service was proposed by the Student Class Association. It is due to the fact that there are fewer hot food stores around the school, convenience stores far away, and hot food in schools. Due to

the long queues for ordering meals and the large number of traffic gatherings during meal times, the school integrates the concepts of smart innovation and digital governance, launches the Smart Campus 4.0 comprehensive service, and builds an ordering system for students, which can be hot to the school in advance You can make an appointment for lunch in the department, and you can pay through Youyoupay or digital student ID card, which saves the time of waiting in line for meal payment for a long time, and achieves a smart cashless campus with one card (digital student ID card) and one payment (youyou card).
