International Climate Development Institute(ICDI)

交通部中央氣象局  
Central Weather Bureau

ICDI國際氣候發展智庫  
International Climate Development Institute

# About the website

International Climate Development Institute

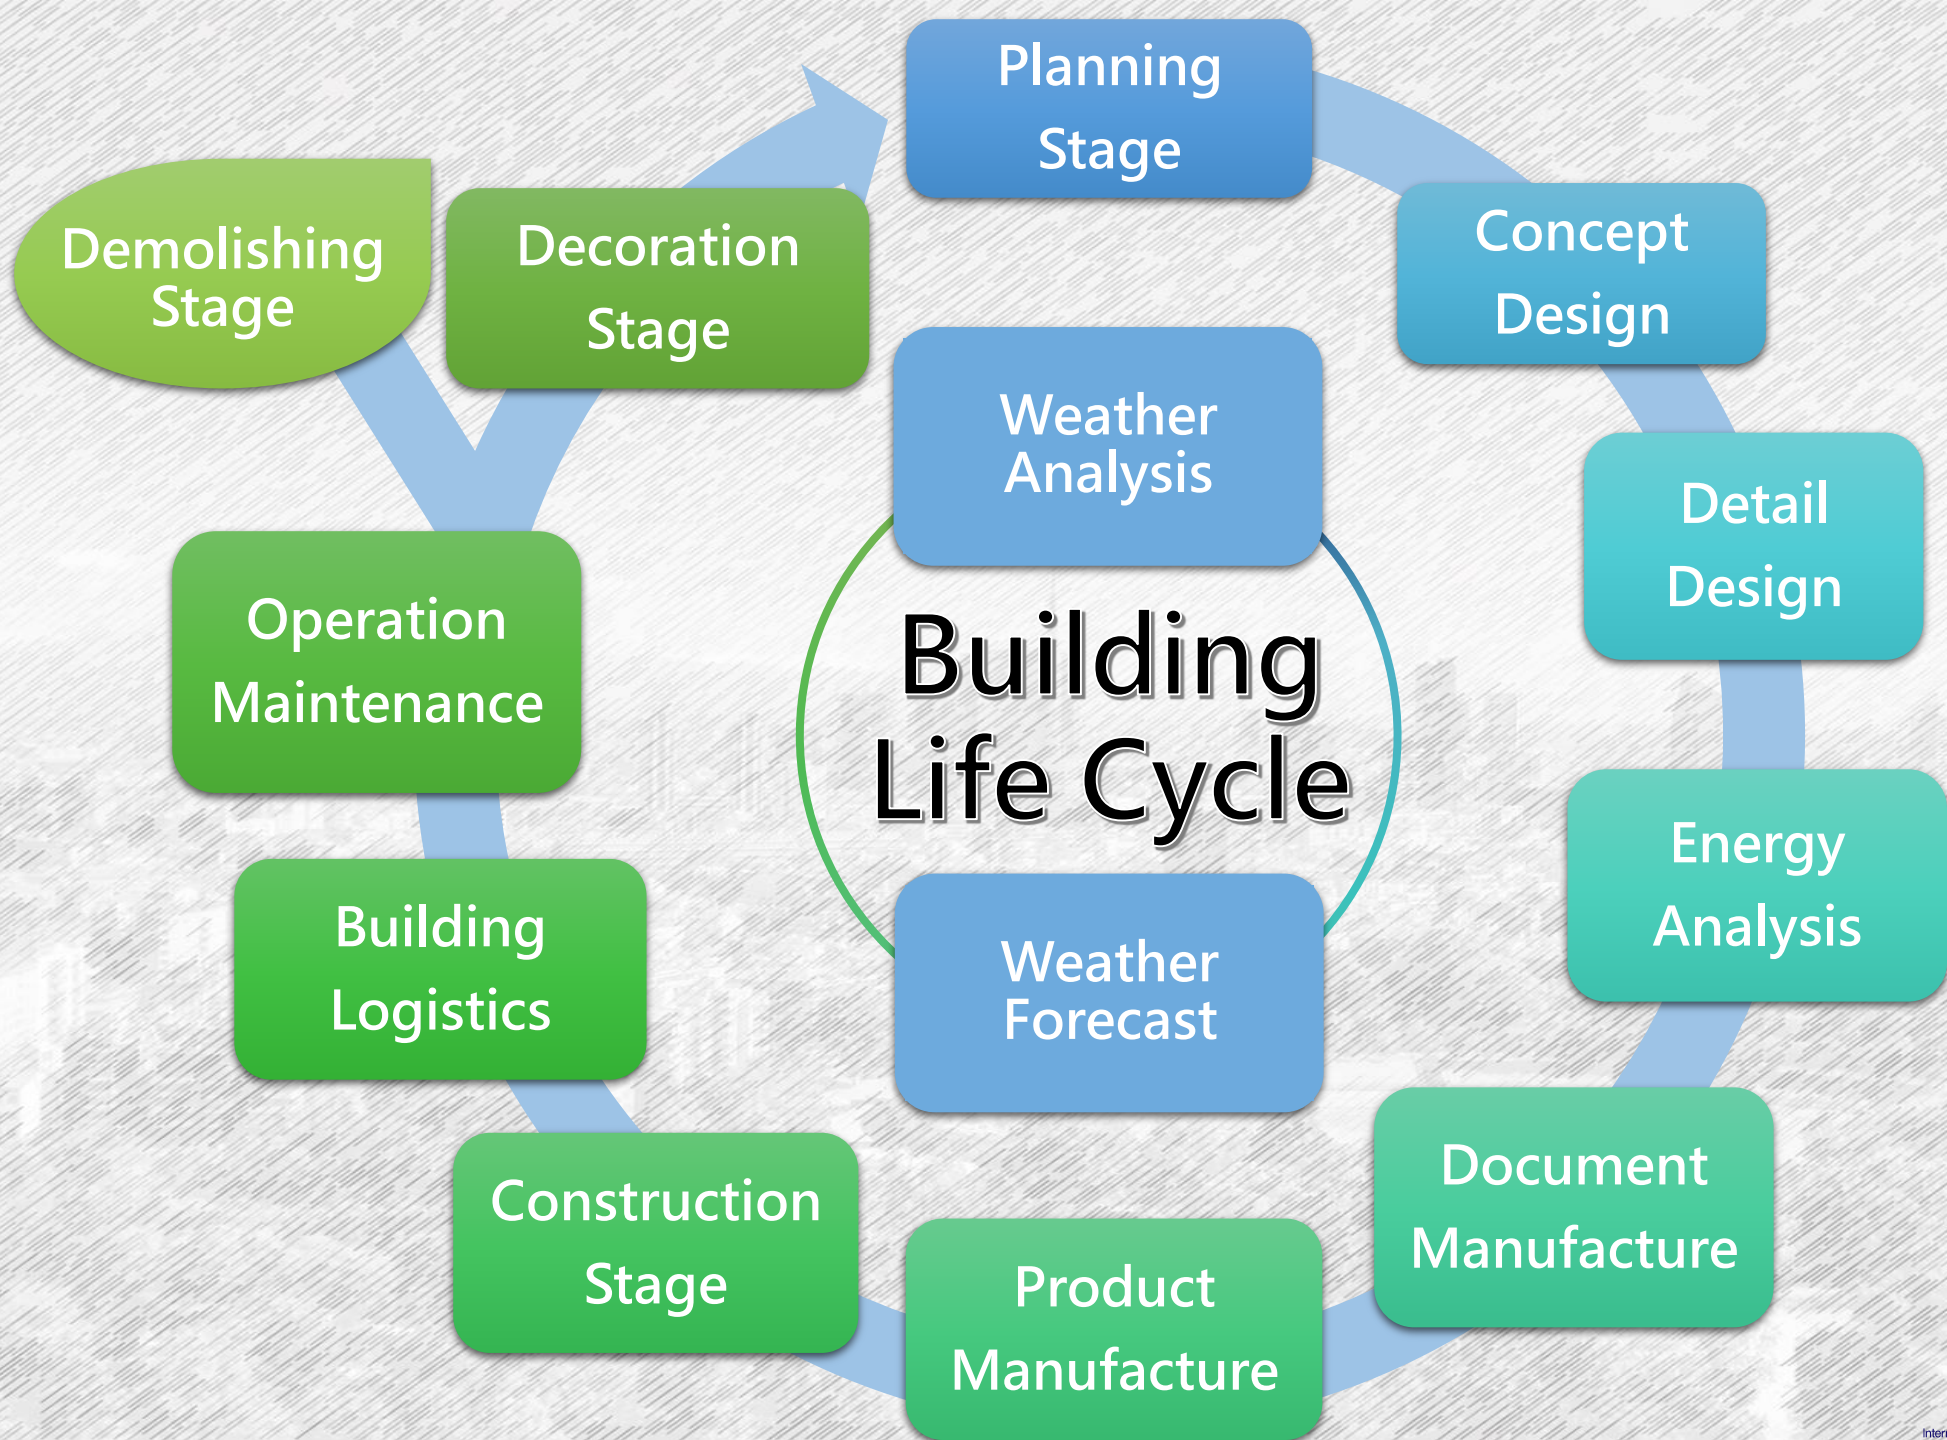

- Global Warming is getting worse day by day. Urban Hot Island Effect makes people use air-conditioners a lot more to lower the indoor temperature. Due to green awareness rising up recent years, green building has become a new mainstream in building design.
- In order to apply energy saving by using dependable weather information from building design to maintenance. ICDI is able to cooperate with Central Weather Bureau and National Building Centre to execute this program with the DELTA company' s support.

- The main goal of this project is to know the maximum possibility of applying climate information in green building design. Establishing a Green building information modeling climate database can be used for building design .

[www.weatherservice.org.tw](http://www.weatherservice.org.tw)

## Services :

- ④ **Providing 26 stations of standard statistical meteorological annual data** 4 kinds of format(csv, tm2, bin, epw)
- ④ **Station data for climate statistic calculation and extreme value**  
745 stations of historical data (Since 1998) from Central Weather Bureau(CWB)
- ④ **Providing ASHRAE Classification for climate design standards**  
450 stations data redesigned their formats according to ASHRAE Handbook 2017
- ④ **3-Days Weather Forecast Data**  
Open data numerical forecast model from Central Weather Bureau(WRF-3KM)  
Including applying API connection for building operation
- ④ **Customizing Sun-tracks**  
Give a specific location with its longitude/latitude and time, we can provide its solar azimuth angle, solar zenith angle...etc.
- ④ **Customizing typical meteorological annual data (single point)**  
Provide csv format for its Typical Meteorological annual data.

## 使用說明

資料說明 網站操作說明 常見問題

### 資料說明

本平台共釋出26個地點的TMY3標準氣象年的資料，依據美國國家可再生能源實驗室(NREL) Method)，並依據NSRDB TMY權重製作而成，歷史資料篩選時間為1998-2017年共20年。每個數據資料，資料內含測站觀測值及太陽輻射量等計算值，若缺乏原始觀測資料，則會使用鄰近的人廣泛應用於能耗軟體及再生能源轉換系統，其數據有自然的晝夜和季節變化，但因數據並非

本平台之原始資料來源皆來自於中央氣象局，各測站缺值部分以鄰近測站或網格之地點或缺值在6小時內，則採用前後時間線性內插法，若原始資料連續缺值超過6小時則採用距離權重

在註冊本平台會員後即可免費下載26個測站TMY3檔案。我們也將致力於更精緻化的點位仍需有更詳盡的資料之需求，請參考捐款說明。

### 捐款與說明

GreenBIM微氣候資訊平台致力於彙整開發節能建築所需的氣候資訊，為維持平台之永續維運與得以永續經營。

捐款金額為單點每年65,000元，可進一步取得以下項目。

- 單點客製化TMY3標準氣象年建置，內容含單點TMY3檔案csv格式、標準氣象年圖資、檔案
- 單點WRF模式未來三天每六小時氣象預報，內容包含氣溫、露點溫度、相對溼度、風向風速
- 單點春分、夏至、秋分、冬至之太陽軌跡圖及其仰角、方位角資料下載。
- 可選擇鄰近三個測站(依所選測站屬性)查詢歷史統計資訊包含風向風速、雨量、極端值、ASHRAE

為推廣氣候資料使用於建築設計，學校單位可透過聯絡我們提供以下相關資訊包含學校單位證明、使用科系、需購買的點位(經緯度)、平台帳號、學校單位捐款金額單點第一年半價32,500元，第二年起可以資料互惠等合作方式，讓在校師生使用本平台資料進行教學及使用。

### 資料更新歷程

2020/5/5 新增13站TMY3(csv,tm2,bin,epw四種格式)資料目前共26站TMY3檔案釋出，新增單點客製化TMY3建置、單點氣象預報資料、單點太陽軌跡、測站歷史統計資料、ASHRAE規範氣候設計條件、平台捐款管道。

2019/3/27 更新13站TMY3(csv,tm2,bin,epw四種格式)資料。

2018/6/15 更新13站TMY3總雲量及蔽光雲量資料內容。

2018/3/7 上傳13站TMY3(csv,tm2,bin,epw四種格式)資料。

## ← Data Information、Website Information、Q&A

### Data Information :

Including statistical information, verification form, and updating timeline

### Website Information :

Including registration, logging in, forget password and steps for data downloading

# Customize typical meteorological year data (single point)

## 1. Input address

## Customize annual Meteorological data

Using the historical data and grid data from CWB stations which are near the location to rebuild your own annual Meteorological data.

## Operating Information

Input the address or latitude/longitude, right click the location, rebuild your own annual Meteorological data and it can be chosen on the list.

## Data Format

Provides csv format for its annual Meteorological data.

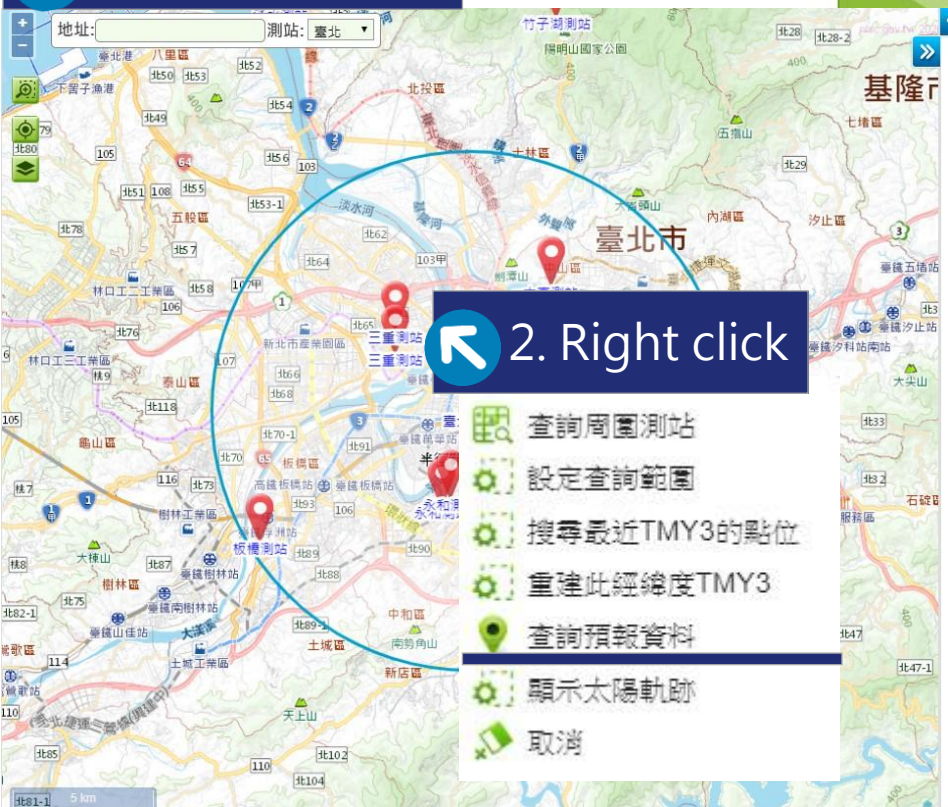

## Building Application

The data is also able to fit in many energy consumption monitoring software.

未來三天氣象預報資料

## Data Source

A total of 745 weather stations historical data from CWB since 1998. Including temperature, wind speed/direction, rainfall..etc..

## Building Application

Maximum wind speed and 24 hours rainfall delay will be able to help the wall design and the capacity of storage reservoir.

## Data Source

Redesign the data from CWB weather station according to ASHRAE Handbook 2017

## Building Application

Able to calculate the air-conditioning load and the condition of energy saving design.
