IRS, flipped the classroom!

According to research, the average grade of a class that normally uses IRS in the classroom can be improved by 5-10 points! Change the traditional one-way teaching method and see the thinking of each student; break the learning pattern of unilateral lectures by teachers and passive listening to students, improve the interaction and concentration between teachers and students, and enhance the classroom atmosphere.

Multiple interactive teaching models, teaching effectiveness upgrade

The IRS interactive response system provides a variety of student feedback modes, such as Buzz-in, Toss-up, Quiz, Knockout Game, Pick-out/SMART Pick-out, etc. Students can also give points based on certain work, speech, performance, etc., and get the total score statistics immediately.

- Pop Quiz
- Toss-up Competition
- Buzz-in Competition
- Quiz / Survey
- Pick-out/SMART Pick-out
- SelfPace(With test paper)
- Knockout Game
- Voting Statistics
- Anonymous Answers

Clear visual statistical chart for more accurate decision-making

IRS is used with HiTeach software that has won the Taiwan Excellence Award. It provides a wealth of chart statistics display functions. For example, the statistics of each option are presented in a visual bar chart or pie chart, group answer analysis, and it can also flop to display each student Answer, statistics of all students who choose various options, etc. Let teachers have statistical charts, leaderboards, history records, learning analysis reports and other information presented immediately during the teaching interaction process to achieve the teaching goals of data decision-making, accurate teaching, and appropriate promotion of talent.

Critical mark and Difficult Mark Individualized learning is more comprehensive

In a smart classroom, if the IRS system is equipped with the intelligent recording mechanism of the AI Terminal, the recording function is started during the class. During the class, each student can use the IRS remote control buttons to mark the Critical Marks or Difficult Marks in the class. After the class, you can automatically generate a unique personal auxiliary learning video for each student, which is an effective way to provide students with personalized learning.

WEB IRS A new era of interaction

In addition to the physical remote control, TEMOTO 2020 has launched a new WEB IRS. There is no need to install any apps, mobile phones, tablets, and computers. As long as there is a browser, teachers and students can interact with each other and send pictures and text without time and space restrictions. All students can express their opinions and thoughts instantly.

WEB IRS

A new era of teacher-student interaction

Besides the physical IRS remote control, this time, TEAM Model introduces the brand new: WEB IRS. It can be used on a browser and doesn't need to install any APP. It allows teachers and students to give feedback and send pictures/messages as if there is no distance limitation. Teachers can instantly check statistical charts, learning records, and learning analysis reports, achieving teaching goals like data decision making, accurate teaching, and teaching students according to their aptitude.

An Excellent Helper for Instant Feedback

IRS Real-time Response Data Decision

Using Pop-Quiz, Knockout Game, Buzz-in, Toss-up, Pick-out/SMART Pick-out, etc., teachers can instantly view information like statistical charts, learning records, and learning analysis reports during the teaching process. This achieves teaching goals like data decision making, accurate teaching, and teaching students according to their aptitude.

Message/Graphic Interaction

Two-way Communication

Sending pictures and messages is as easy and intuitive as using messaging software. Built-in editing tools allow every student to express their opinions and ideas in real-time.

Built-in editing tools

Cross-platform integration

Available on all devices

Any device with a browser, such as smartphones/tablets/computers, can instantly interact and feedback as if there is no distance limitation

Reviews from first-line teachers

Teacher A

Before, I was afraid of integrating technology into teaching and often had trouble operating it. However, WEB IRS is easy to use and convenient for teaching and learning interactions. It provides timely feedback, which makes it truly worth using in classrooms.

Teacher B

Wow! It's amazing how even a cell phone can transform into an IRS! It's wonderful to see students' thoughts and give feedback through such a way of sending messages. You can say goodbye to the days when you have to count every student one by one, and say hello to instant statistics and immediate feedback that WEB IRS brings!

Teacher C

The advancement of technology is what we all know. For us teachers, not only is technology used in daily life, but also as a powerful tool for teaching and learning. It increases the effectiveness of learning and also lets us know more about how to help our children.
