

Trusted IoT

Jrsys
INTERNATIONAL CORP.

Jrsys IoT Security solution is a light weight, high performance IoT security platform built by Jrsys TRUST cloud service, IoT security suite, and device security life cycle management system to fulfill strong e-Authentication, secured private communication, firmware secure boot, and device key management.

Jrsys protects your data's confidentiality, integrity, non-repudiation, and availability.

By issuing IoT Webtrust® certificate, only the legal devices on the white-list can be operated in this eco system to make sure these IoT connected devices have secure links and safe communication to make your life better.

■ Support

- Communication protocols including RoLa, NBLoT, and Bluetooth
- Secure access from PC and Mobile

■ Devices Management

- Device life cycle management
- Webtrust certificate management
