Connection to the world

Where decisions are never restricted

Founder | Kevin Wu

• WUWOW - The most effectual online English learning platform

WUWOW provides 25-minute online English sessions, allowing students to be immersed in an English-speaking environment right at home, connecting them to the whole world simultaneously. Not only did we discover English learning's ultimate Sweet Spot - the best concentration and efficiency by breaking away the time and space limits of offline learning as well as using our self-made materials specially designed for 25-minute sessions, but also fully utilize the features of digital learning, provide better student evaluations and learning outcome managements through collected data, and make the best use of the system's class arrangement flexibility. All of the above-mentioned is what creates WUWOW: The most effectual online English learning platform.

• WuShare - Learn as you wish

WuShare provides "videos" and "online teaching," a brand new innovative one-stop learning model. Deeper and detail-oriented contents are presented through videos allowing learners to repeatedly review. As for those that require logic, contemplation, and other interactive content, they are presented through online teaching. Along with articles and condensed versions of the classes, these learning resources allow students to not only get what they pay for, but also maximize the efficiency of learning and each penny of their budget.

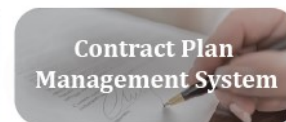

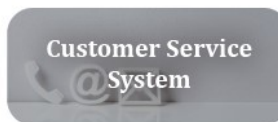

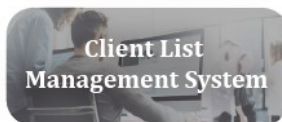

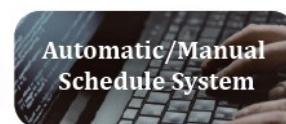

Powered by

The "Link Share Together" Intelligent Mobile Learning System

Realize the possibilities of online education

On the student's end, the LST Intelligent Learning System successfully merges "students, materials, and teachers," and schedules daily lessons based on students' levels and material preferences, which provides maximum schedule flexibility to meet all kinds of two-way requirements on both the teacher and student's side. On the teacher's end, our system owns quite a few functions including the allocation of a complete client list, automatic/manual class scheduling, and customer service. Other than the above-mentioned, our system may also fully manage the online educational business and create a more effectual and flexible business model compared to the offline education industry, by receiving advice from both teachers and students and valuable data regarding service adjustments and optimizations through the two-way evaluation.

WUWOW's Video Conferencing System

All remote learning problems are smoothly solved

WUWOW's video conferencing system is the best online learning system that replaces traditional video conferencing systems and was developed to create an outstanding learning environment having the most complete note-taking system allowing teachers and students to organize their notes directly in class, without the need to use other supporting softwares. Other functions include, role distinction (For example: presenters, students, spectators, and the customer service each have their own distinctive rights), message classification, instant voting system, tickers, and remote control etc. It allows the online educational workflow to run smoothly, satisfying every online educational requirement in one system.

★ Received positive feedbacks from over 4,000 users

★ Over 400,000 lessons completed
