

TaiwanBar

Teaching a child how to fish will not feed him for a lifetime
- unless we convince him to enjoy eating fish!

Taiwan Bar is committed to creating innovative educational contents that appeal to students' interest and encourage proactive learning. Such educational contents come in a variety of different forms, including animated videos, teaching curricula, teaching aids, tabletop games, and educators' workshops, etc.

Taiwan Bar's key strength lies in the capability to accurately translate complicated, professional domain knowledge into enjoyable videos, and further develop teaching/learning materials centered around these videos. The teaching/learning materials focus on motivating students and building their creativity and critical thinking abilities; they are also tightly linked to the UN's Sustainable Development Goals (SDGs), as well as to the Core Competencies listed in Taiwan's 2019 Curriculum Guidelines.

Taiwan Bar also owns a YouTube channel and a Facebook page with a combined fanbase of more than a 1 million followers, allowing the influence of our educational works to spread fast and wide.
