

Realtime Smart Smoke / Fire Detector

+

Detect Smoke and Temperature

Easy Installation

Sustainable Power

Wireless Network

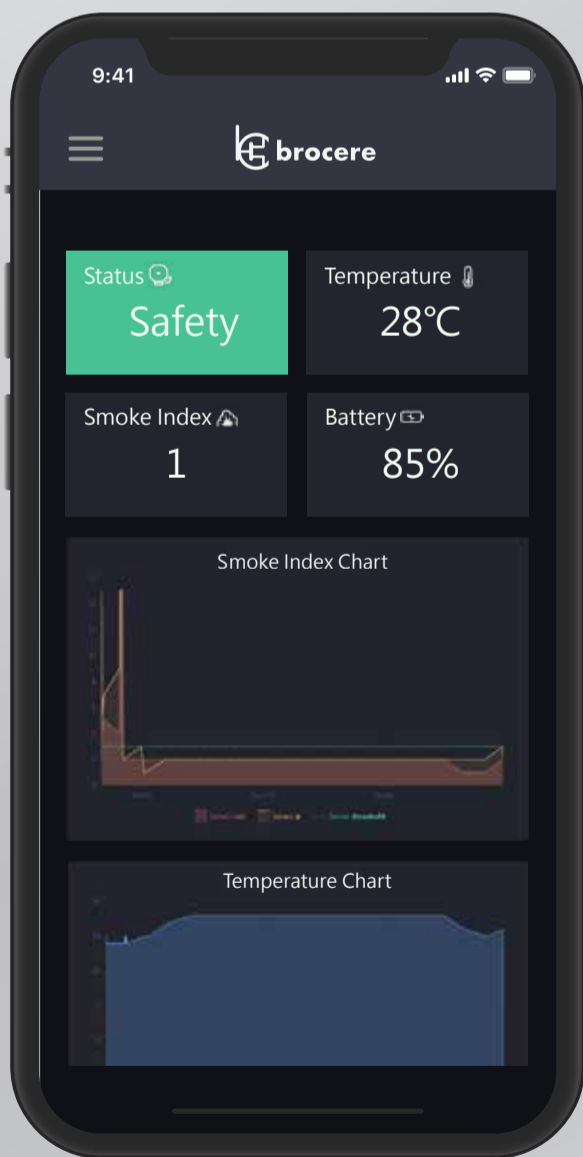

Durable Material

Made of wear-resistant and waterproof material, can adapt to various environments.

Wildfire Monitoring

Applicable to indoor and outdoor environments, and detect wildfires at the earliest moment.

Real Time Alert

Detect smoke and temperature every 10 seconds, and send alert signal to user device, security guards, and fire departments immediately while detecting a fire.

Fire Field Analysis

With building architecture information, the system can analyze the ignition location and the smoke/fire dangerous area, which help user to escape and firefighter to understand the situation of the fire field.

Heart Beating Message

Send heart beating message to cloud per day including remaining battery capacity.
