In addressing society's growing demand for sustainable urban development and to solving urban issues, Taipei Computer Association (TCA) has gathered the various industry sectors to establish a platform for building business-to-business partnership and collaboration, and for generating business opportunities.

Taiwan's best within the ICT industry showcase their technologies and applications at this event to demonstrate the innovation achievable through integration.

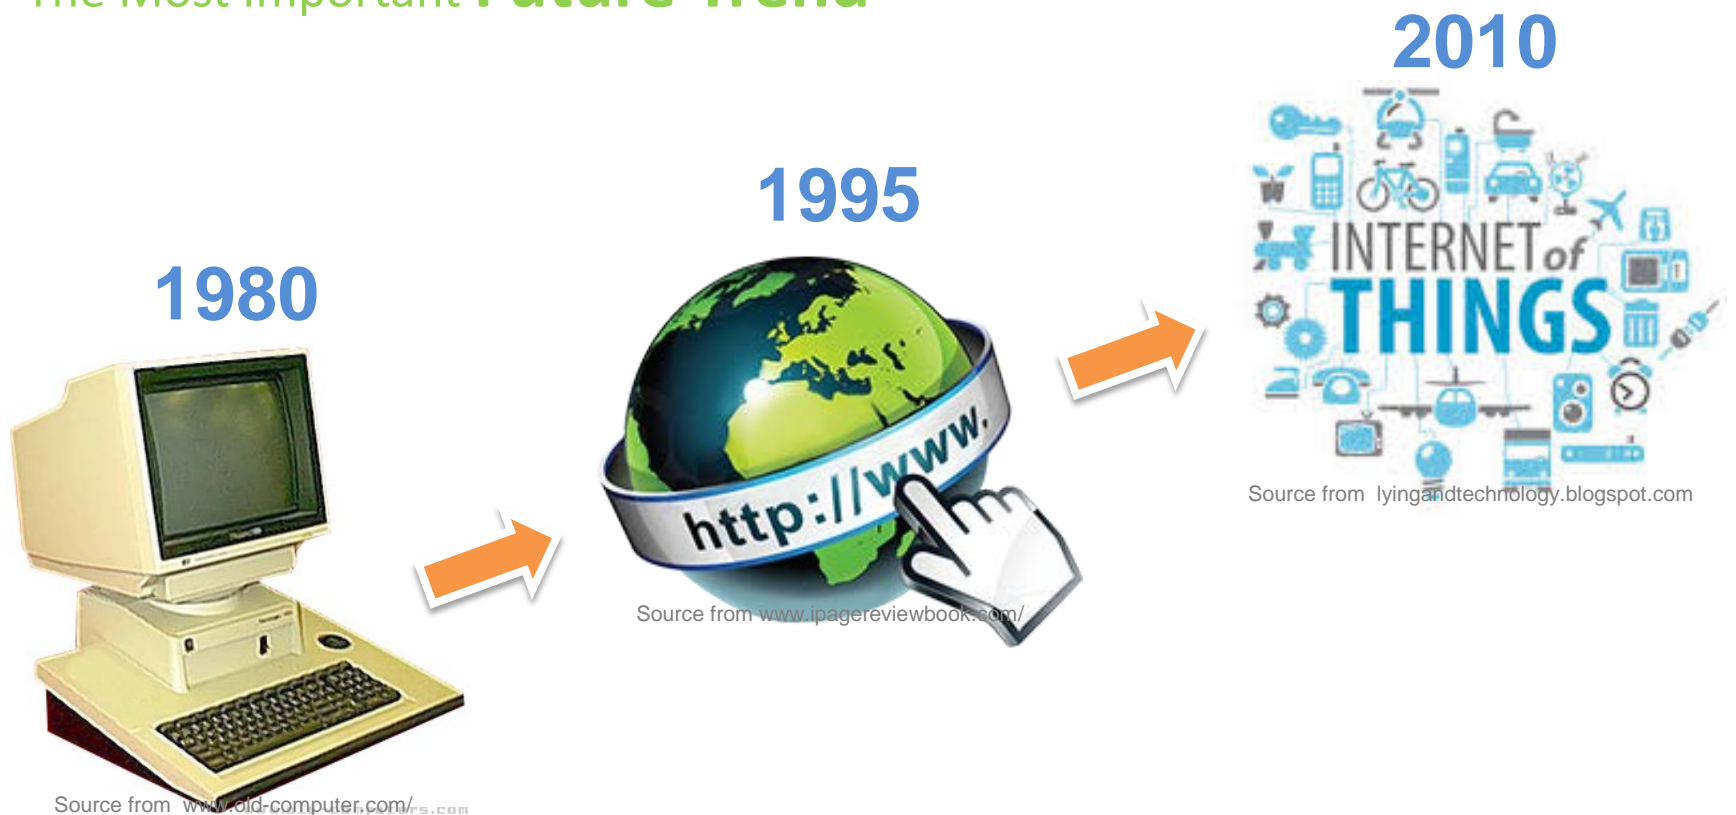

The 2015 Smart City Summit & Expo includes the following 5 features: exhibition, mayor's summit, forums, the Innovative Applications Award, and the Real Site Demonstration. These 5 features work together to make this expo the most comprehensive intelligent solution event in the Asia-Pacific region.

TCA's vision is to see the Smart City Expo become Asia's main communication and exchange platform for the promotion of integrated services and solutions.

Become a part of this global event in forming business partnerships and opportunities, as well as in shaping the future of our smart cities' development.

Smart City

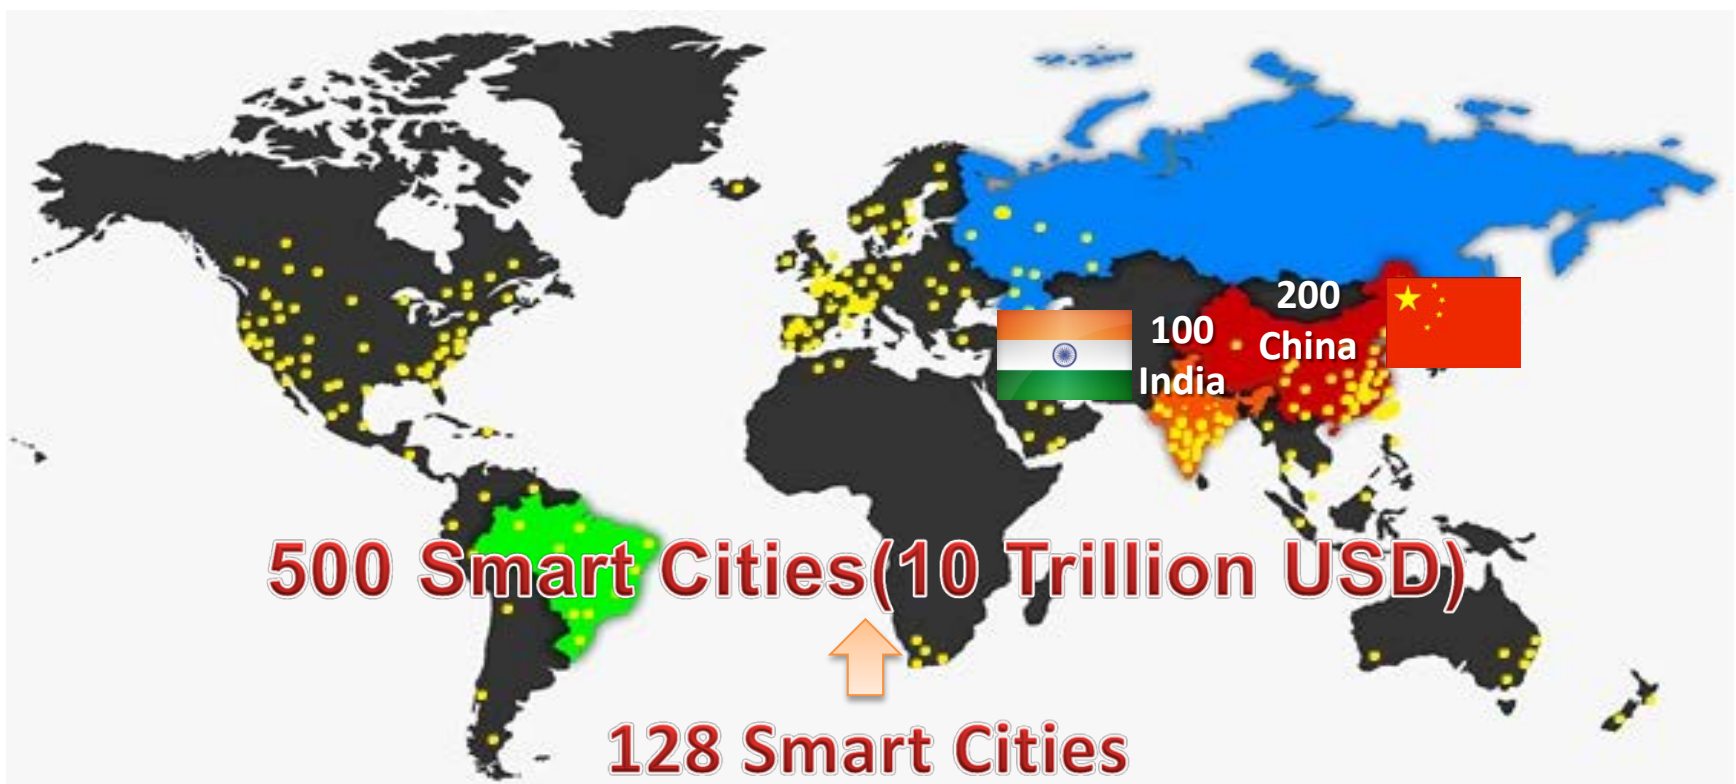

The Most Important Future Trend

Every 15 years there is a leap in tech development. People now use smart phones, tablets, and other wearables to solve daily problems, such as searching for maps, organizing schedule, communicating, and even shopping. **This paradigm shift has revolutionized our lives.**

Smart City

The Foundation for Delivering Next-Generation Services to Citizens

Smart city is an already established **global trend**, with 128 smart cities around the world, mostly from developed nations. On the other hand, developing nations like **India** and **China** are also catching up with **major projects** on their own smart city developments. As a result, we will be seeing approximately **500 smart cities** with **10 trillion** business opportunities in the **coming few decades**.
